**UNRWA's comments to CMIP's findings on
Palestinian Authority textbooks**

In February 1999 the State Department published "Report to Congress on Textbooks and Curricula used by UNRWA" referring explicitly to CMIP's findings and confirming the existence of anti-Semitic material in the textbooks studied. This report states that the "US Government will approach the PA and other governments responsible for these texts, to urge them to eliminate anti-Semitic material. This report was based on a systematic review of CMIP's study, carried out by UNRWA's education department, with the "technical help of UNESCO". UNRWA's review acknowledged that most of CMIP's findings were factually accurate.
